RECYCLE FOOD SCRAPS
SAVE MONEY AND RESOURCES
EASY TO START!

CLOSE NATURE'S LOOP BY COMPOSTING YOUR FOOD SCRAPS!

Rather than going to the landfill, food scraps can be processed into compost, which enriches soil naturally.

AVAILABLE CONTAINERS

BINS:
 Green bins in 1-yard, 2-yard, 3-yard and 4-yard sizes are available for businesses that routinely generate large quantities of food scraps.

CARTS:
 A 64-gallon cart is available for businesses that routinely generate small volumes of food scraps.

Printed on Recycled Paper

RESOURCES

The City of Fremont and its partners, Allied Waste Services and Stopwaste.Org bring you the Composting for Business Program. For more information on business recycling and waste reduction, please contact:

JOIN COMPOSTING FOR BUSINESS

EASY TO START

- 1 Get a free consultation by our experts:**
 - We will conduct a waste assessment to identify your recycling and garbage needs
- 2 Receive free training and technical assistance:**
 - Color posters for your business with pictures of acceptable material
 - Free indoor containers
 - Training for your staff in English, Spanish or Chinese
- 3 Reduce your garbage costs:**
 - Separate compostable materials from garbage
 - Composting collection is nearly half the cost of garbage service
 - Reduce your garbage volume and increase recycling

FREE CONTAINERS:

"IN-KITCHEN" CONTAINER:

Intermediary containers can tuck into tight food prep areas, making food scrap recycling more space efficient. Typically, there can be three or four of these stations per kitchen.

- STYROFOAM™
- Glass
- Metals
- Grease trappings or tallow
- Liquids

DID YOU KNOW?
 Food decomposing in a landfill contributes to climate change!
 Please compost it instead.

BENEFITS OF COMPOSTING:

- Potential to reduce disposal costs
- Improve your image as an environmental leader
- Reduce waste going to a landfill
- Prevent greenhouse gas emissions
